

Map-A-Doodle-Do

My Map Doodles began when we relocated. I was able to spend time tracking my fitness routes on designated walking paths. I've always been intrigued by maps, globes, and the atlas. Truly, there are two types of people: those who enjoy maps and an altogether different species. I consider myself a walker and nature explorer. If there is a way to document the walks in an artistic way, I want to be a part of that endeavor—usually a quick snap of the photo or a glance at my fitness data. What started off as a joke, morphed into as much fun as the walks. Here are some creatures 'found' during my walking adventures.

Kenner Run

0.8 mi - 9:03 - 10:58/mi

Harrison C

0.2 mi - 2:40
